

## ESL Grades 11-12 Curriculum Planning Guide – Quarter 3

In 2014, the Shelby County Schools Board of Education adopted a set of ambitious, yet attainable goals for school and student performance. The District is committed to these goals, as further described in our strategic plan, Destination 2025.

### **By 2025,**

- **80% of our students will graduate from high school college or career ready**
- **90% of students will graduate on time**
- **100% of our students who graduate college or career ready will enroll in a post-secondary opportunity.**

In order to achieve these ambitious goals, ESL teachers must collectively work with general education teachers to provide our students with a sound foundation in the English language as well as high-quality, College and Career Ready standards-aligned instruction. Acknowledging the need to develop competence in literacy and language as the foundations for all learning, Shelby County Schools developed the Comprehensive Literacy Improvement Plan (CLIP). The CLIP ensures a quality balanced literacy approach to instruction that results in high levels of literacy learning for all students, across content areas. Language and literacy development is recognized as a shared responsibility of all of a student's teachers. Destination 2025 and the CLIP establish common goals and expectations for student learning across schools and are the underpinning for the development of the ESL curriculum planning guides.

Designed with the teacher in mind, the ESL curriculum planning guides focus on literacy teaching and learning, which include the development of foundational skills and instruction in reading, writing, speaking and listening, and language. This planning guide presents a framework for organizing instruction around WIDA Standards, grade-level content, and the TN State Standards (CCR) so that every ELL student acquires English and develops literacy skills that will enable him or her to meet or exceed requirements for college and career readiness. The standards define what to teach within specific grade bands, and this planning guide provides guidelines and research-based approaches for implementing instruction to ensure students achieve their highest potentials.

- A standards-based curriculum, performance-based learning and assessments, and high quality instruction are at the heart of the ESL Curriculum guides. ESL teachers will use this guide and the standards as a road map for English Language Development.
- The Newcomer/Readiness curriculum provides additional guidance and resources for new immigrant students and those with interruptions in formal education. Newcomer/Readiness materials are designed for use in the first 6 to 9 weeks of enrollment.

### How to Use the ESL Curriculum Planning Guides

Our collective goal is to ensure our students graduate ready for college and career. This will require a comprehensive, integrated approach to literacy instruction that ensures that students become college and career ready readers, writers, and communicators. To achieve this, students must receive literacy instruction aligned to each of the elements of effective literacy program seen in the figure to the right. To enhance ELL access to instructional tasks requiring complex thinking match the linguistic complexity and instructional support to the students' level of proficiency. (Gottlieb, Katz, and Ernst-Slavit 2009)

This curriculum guide is designed to help teachers make effective decisions about what literacy content to teach and how to teach it so that, ultimately, our students can reach Destination 2025. To reach our collective student achievement goals, we know that teachers must change their instructional practice in alignment with the three College and Career Ready shifts in instruction for ELA/Literacy. We should see these three shifts in all SCS literacy classrooms:

- (1) Regular practice with complex text and its academic language.**
- (2) Reading, writing, and speaking grounded in evidence from text, both literary and informational.**
- (3) Building knowledge through content-rich nonfiction.**

Additional time, appropriate instructional support, and aligned assessments will be needed as ELL acquire both English language proficiency and content area knowledge. The TN Standards for Foundational Skills should be used in conjunction with this guide.

### The Five WIDA English Language Development Standards

	Standard	Abbreviation
English Language Development Standard 1	English language learners communicate for Social and Instructional purposes within the school setting	Social and Instructional language
English Language Development Standard 2	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts	The language of Language Arts
English Language Development Standard 3	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics	The language of Mathematics
English Language Development Standard 4	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Science	The language of Science
English Language Development Standard 5	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies	The language of Social Studies

Standard 1 recognizes the importance of social language in student interaction with peers and teachers in school and the language students encounter across instructional settings. Standards 2–5 address the language of the content-driven classroom and of textbooks, which typically is characterized by a more formal register and a specific way of communicating (e.g., academic vocabulary, specific syntactic structures, and characteristic organizational patterns and conventions).

## ESL Grades 11-12 Curriculum Planning Guide – Quarter 3

Throughout this curriculum guide, teachers will see high-quality texts that students should be reading, as well as some resources and tasks to support teachers in ensuring that students are able to reach the demands of the standards in the classroom. In addition to the resources embedded in the map, there are some high-leverage resources around each of the three shifts that teachers should consistently access:

The TNCore Literacy Standards	
<p><b>The TNCore Literacy Standards (also known as the College and Career Ready Literacy Standards):</b> <a href="http://www.eduToolbox.org">http://www.eduToolbox.org</a></p>	<p>Teachers can access the TNCore standards, which are featured throughout this curriculum map and represent college and career ready student learning at each respective grade level.</p>
Shift 1: Regular Practice with Complex Text and its Academic Language	
<p><b>Student Achievement Partners Text Complexity Collection:</b> <a href="http://achievethecore.org/page/642/text-complexity-collection">http://achievethecore.org/page/642/text-complexity-collection</a></p>	<p>Teachers can learn more about how to select complex texts (using quantitative, qualitative, and reader/task measures) using the resources in this collection.</p>
<p><b>Student Achievement Partners Academic Work Finder:</b> <a href="http://achievethecore.org/page/1027/academic-word-finder">http://achievethecore.org/page/1027/academic-word-finder</a></p>	<p>Teachers can copy and paste a text into this tool, which then generates the most significant Tier 2 academic vocabulary contained within the text.</p>
Shift 2: Reading, Writing and Speaking Grounded in Evidence from the Text	
<p><b>Student Achievement Partners Text-Dependent Questions Resources:</b> <a href="http://achievethecore.org/page/710/text-dependent-question-resources">http://achievethecore.org/page/710/text-dependent-question-resources</a></p>	<p>Teachers can use the resources in this set of resources to craft their own text-dependent questions based on their qualitative and reader/task measures text complexity analysis.</p>
Shift 3: Building Knowledge through Content-Rich Non-fiction	
<p><b>Student Achievement Partners Text Set Projects Sequenced:</b><a href="http://achievethecore.org/page/1098/text-set-project-sequenced-under-construction">http://achievethecore.org/page/1098/text-set-project-sequenced-under-construction</a></p>	<p>Teachers can use this resource to learn about how to sequence texts into “expert packs” to build student knowledge of the world.</p>

## Text Complexity

### ONGOING Reading for Information #10 (See [Page 21](#) for corresponding writing tasks)

By the end of grade 11, read and comprehend literary nonfiction in the grades 11-CCR text complexity band proficiently, with scaffolding as needed at the high end of the range.

By the end of grade 12, read and comprehend literary nonfiction at the high end of the grades 11-CCR text complexity band independently and proficiently.

Point to key words and phrases that describe a work of literary nonfiction using the appropriate instructional supports applicable to the grade level and proficiency level of the student such as illustrated word banks and L1 and/or L2 with a partner.	Highlight key words and phrases that describe a work of literary nonfiction using the appropriate instructional supports applicable to the grade level and proficiency level of the student such as illustrated word banks with a partner.	Identify the main idea to understand a work of literary nonfiction using the appropriate instructional supports applicable to the grade level and proficiency level of the student such as word banks or graphic organizers in a small group.	Infer meaning based on evidence in the text to understand a work of literary nonfiction using the appropriate instructional supports applicable to the grade level and proficiency level of the student such as graphic organizers in a small group.	Demonstrate understanding of a work of literary nonfiction using the appropriate instructional supports applicable to the grade level and proficiency level of the student as needed.

CEFR Levels (Common European Frame of Reference) Pathways uses these guidelines:

VISIONS	LEXILE	READABILITY
A	680	4-6
B	740	5-7
C	720	6-8

A1 - **Beginners level** - basic knowledge of the language, familiar everyday expressions and simple phrases

A2 - **Pre-Intermediate level** - familiar with frequently used expressions and conversation on routine matters

B1 - **Intermediate level** - Can understand the main points of clear standard input on familiar matters regularly encountered in work, school, leisure, etc. Can deal with most situations likely to arise whilst travelling in an area where the language is spoken. Can produce simple connected text on topics which are familiar or of personal interest. Can describe experiences and events, dreams, hopes & ambitions and briefly give reasons and explanations for opinions and plans.

B2 - **Independent User (upper intermediate)** - Can understand the main ideas of complex text on both concrete and abstract topics, including technical discussions in his/her field of specialization. Can interact with a degree of fluency and spontaneity that makes regular interaction with native speakers quite possible without strain for either party. Can produce clear, detailed text on a wide range of subjects and explain a viewpoint on a topical issue giving the advantages and disadvantages of various options.

C1 - **Advanced level** - Can understand a wide range of demanding, longer texts, and recognize implicit meaning. Can express him/herself fluently and spontaneously without much obvious searching for expressions. Can use language flexibly and effectively for social, academic and professional purposes. Can produce clear, well-structured, detailed text on complex subjects, showing controlled use of organizational patterns, connectors and cohesive devices.

One way to start thinking about matching text and reader is to begin with what you already have. So, take a text that you teach frequently. Now consider how you would make that text more complex by changing the tasks. This is one way that we dial up Text Complexity. We change the task not the text.

A second prompt for you to think about, now take a task that is often very challenging for students. Think about how you could scaffold it with more accessible text. This time think about shorter texts. Think about non-traditional texts. Are there ways that you can match text with task in that way?

Finally, another way to increase complexity is in juxtaposing or comparing texts. So how could you take a central text that you have in your class? How could you make it more complex to comparison, conversely? How could you make it more accessible?

Writing Tasks 1 – Use in conjunction with [Page 5 Reading for Information #1](#)

Cite the textual evidence that most strongly supports an analysis of what the text says explicitly as well as inferences drawn from the text.

[Strategies for teaching ELLS](#)

Level 1	Level 2	Level 3	Level 4	Level 5
Copy key words from a text to express what it says explicitly, what is implied, and what is unclear from visually supported text using an illustrated word bank with a partner.	List phrases and simple sentences from a visually supported text to express what is stated explicitly, what is implied, and what is unclear using an illustrated word bank and sentence frames.	Write simple sentences using key words and phrases based on evidence of what the text says explicitly, what is implied, and what is unclear using graphic organizers in a small group.	Write a paragraph based on evidence of what the text says explicitly, what is implied, and what is unclear using key details in the text in a small group.	Summarize what the text says explicitly, what is implied, and what is unclear based on evidence from a text in a small group.

Writing Tasks 2 – Use in conjunction with [Page 6 Reading for Information #2](#)

Determine a central idea of a text and analyze its development over the course of the text, including its relationship to supporting ideas; provide an objective summary of the text.

### Literacy Strategies for Teaching in a Second Language, L2

#### Pre Reading Strategies

- Assess students' background knowledge of the text
- Activate students' background knowledge of the text so students can connect that knowledge with what they will read in the text
- Provide students with the background knowledge needed to comprehend the upcoming text
- Discuss the author, story, or text type
- Consider visual illustrations, drawings, diagrams, or maps
- Predict text content
- Increase students' interest and to motivate students to read the text
- Clarify cultural information to help students to understand the text
- Make students aware of the purpose for reading
- Help students to navigate the type of text they will be reading
- Provide an opportunity for group or collaborative work
- Promote class discussion about the upcoming reading
- Teach skimming and scanning techniques
- Provide any language preparation needed to successfully read the text
- Highlight new vocabulary found in the text

#### During Reading Strategies

- Draw attention to word formation clues
- Read for specific pieces of information
- Distinguish between cognates and false cognates
- React to texts with summaries
- Make predictions
- Summarize text content
- Clarify and comprehend text content
- Identify and use visual reading aids
- Understand the story line / sequence of ideas
- Restate main ideas

- Interact with the text through directions and questions
- Understand the writer’s purpose and intention
- Recognize the text structure and text organization
- Discover cross-cultural differences in reading
- Find the answers to pre-reading questions

### Post Reading Strategies

- Dramatize interviews based on the text
- Reenact the text
- Transfer the reading content to other types of written or spoken work
- Make connections
- Extend the reading experience
- Cement the learning from the pre-reading and during reading activities
- Lead students into a deeper analysis of the text or meaning of the reading
- Use information in classroom games
- Review target vocabulary words and structures
- Review critical questions and comprehension of the text

40 Ways to Read Like a Detective

**40 Ways to Read Like a Detective:**

# 1

**Strategy:** Close Reading

**Description:** Close reading brings the text and the reader close together.

1. Read with a pencil in hand, and annotate the text. Mark the big ideas and skills.
2. Look for patterns in the things you've noticed about the text – repetitions, contradictions, similarities.
3. Ask questions about the patterns you've noticed – especially how and why.

**Instructional Activity:** One strategy for guiding students through a close reading is to have them look for instances where authors repeat a word or phrase, an image, or event. Choose a rich and worthy text. Follow the steps above to closely read portions of the text. (Teacher may also read aloud.) When you notice something that happens over and over again, stop and ask yourself: Why do you think the author repeats this word(s)? The answer will most likely tell you something about the character, the plot, or the theme.

## 40 Ways to Read Like a Detective: # 2

**Strategy:** Collaborative Annotations (Say Something)

**Description:** Annotating is a writing-to-learn strategy experienced readers use to make sense of complex texts. It is an interactive process between the reader, text, and peers. This strategy provides students with time to grapple with the text and articulate their thoughts in writing prior to engaging in small and whole group discussion. The use of this strategy increases level of student engagement and classroom participation.

**Instructional Activity:** In groups of 3, students individually read and annotate a text using metacognitive sentence starters provided by the teacher to prompt thinking. (I think the author \_\_\_\_\_ because \_\_\_\_\_.) Students pass their annotated text to the person on the right. Each student responds to original reader's annotations. The next time the papers pass, each individual adds his/her notes to both of the previous readers' responses. This process engages students in one rich text multiple times and serves as a springboard for group dialogue.

## 40 Ways to Read Like a Detective:

# 3

**Strategy:** Zoom In (See-Think-Wonder)

**Description:** This strategy focuses on looking closely at an image/text and making interpretations. Only portions of the image are revealed at a time, so each time, the student reassesses his or her interpretation in light of the new information. This strategy engages students with material in a way that seeing the whole image at once sometimes does not. It focuses on the importance of being open-minded and flexible enough to change your mind as new and conflicting information is revealed, thus making the original hypothesis no longer true.

**Instructional Activity:** Choose a text or an image. (Examples might be a section of a complex painting, a photograph, a historic document, graph, chart or poem.) Look closely at the small bit of image that is revealed. What do you see? Based on what you are seeing, what do you think it means? Reveal more of the image. What new things do you see? Does this change your hypothesis or interpretation? If so, how? Has the new information changed your previous ideas? Now, what are you wondering about that is not observable in the text or image? Continue the process of revealing and questioning until the entire image has been revealed. What other questions are you wondering about?

**40 Ways to Read Like a Detective:**

**Strategy:** Sustained Silent Reading

**Description:** Sustained Silent Reading develops fluent readers by providing time during the school day for students to select a book and read quietly. Hiebert & Reutzel, 2010, offer 4 conditions that improve the practice of silent reading in the classroom. 1) Student self-selection of reading materials. 2) Student engagement and time on task during silent reading time. 3) Accountability of students 4) Interactions among teachers and students around text.

**Instructional Activity:** With teacher guidance, students select a text that matches their ability level, is interesting and draws from a variety of genres and topics. 1) Students silently read the passage. 2) With a partner, discuss each passage. 3) Record 3 main ideas in the text or in your notes.

Note for teacher: Be a model for your students by reading during this time.

## 40 Ways to Read Like a Detective:

# 5

**Strategy:** Think-Aloud

**Description:** A metacognitive practice that builds independence in reading. When you think aloud, you stop the reading from time to time and share how you're negotiating the text and constructing meaning. Think-alouds provide the opportunity for students to see how an expert reader returns to the text to understand more fully what is happening in the text. Think-alouds focused on texts use the processes of read alouds and shared readings.

**Instructional Activity:** 1) Choose a short section of text. 2) Select a few strategies (activating prior knowledge, predicting, visualizing, monitor comprehension, use fix-up strategies to address confusion and repair comprehension). 3) State your purpose for reading and tell the students to focus their attention on the strategies you are using. 4) Read the text aloud to students and model the chosen strategy as you read. 5) Have students annotate the text by underlining the words and phrases that helped you use a strategy. 6) Brainstorm what cues and strategies that were used. 7) Ask students to reflect on the strategies they are using and think about how they could be used in other reading or real life situations. 8) Follow-up lessons may be needed to reinforce the think-aloud strategy.

**Strategy:** Read-Aloud

**Description:** A strategy that models reading for deep understanding of text. Reading aloud to students should include think-aloud or interactive elements and focus intentionally on the meaning within the text, about the text, and beyond the text (Fountas & Pinnell). Use read aloud to build vocabulary, build knowledge, understand story structure, teach the reading process in a meaningful context, model fluency, and motivate students to read. An additional part of the process of read aloud is for the teacher to provide opportunities for students to respond to the text.

**Instructional Activity:** Read Aloud can be used to begin a class.

The teacher chooses a poem that is above the instructional level of the average students in the class and is appropriate to their interests, developmental, social and emotional levels. Teacher previews and practices the selection. The teacher reads the selection fluently. This sets the tone for the class and provides a model of good writing for students. After reading, a brief discussion about vocabulary, phrases, and/or author's word choice that stood out to students can be discussed.

**Strategy:** Making Inferences (Second Draft Reading)

**Description:** Reading complex texts require students to reread to move beyond surface-level comprehension to making inferences that are not literally found on the page. Reading closely, skilled readers can make inferences in a multitude of ways. Examples include: recognizing the antecedents for pronouns, using context clues, identifying intonation of words, recognizing author's biases, and so much more.

**Instructional Activity:** Teacher Models: 1) Following a first draft reading of a complex text, the teacher makes inferences in the margins. 2) The teacher explains how he/she used the text to make inferences and describes the different types of inferences skilled readers make using the text (Think-Aloud). Guided Practice: 3) During a second draft reading, students read a text and make inferences in the margins. 4) Students must be able to articulate how the inferences are drawn based on evidence in the text. 5) During a whole group discussion, students generate a list of what experienced readers do to make inferences. Independent Practice: 6) Students create bookmarks with prompts for making inferences.

**Strategy:** Speak the Text

**Description:** Use a speech to analyze the impact of certain words, meaning, and tone.

**Instructional Activity:** Using a speech, have students insert line breaks anywhere they would naturally pause when speaking the text and underline or highlight words that should carry emphasis. Then, have students reconfigure the highlighted words and line breaks, thus placing emphasis in different places to see how it changes the tone of the text. Discuss the subtle differences when you change which words are emphasized. How do you think the speaker intended to deliver the speech?

**Strategy:** Skim, Scan, Peruse, or Browse

**Description:** Guide students in giving a text the once over before committing to it. Though concerns arise when students attempt to scan a text as a deep-reading *methodology*, the *task* of scanning a text to obtain the gist can certainly have value.

**Instructional Activity:** Select a text for students which has an obvious layout/organization which is approximately 1-2 pages long. Give students 2-3 minutes to skim through the text. Following this, have students break into small groups and discuss briefly their thoughts about the text. It is recommended that teachers avoid “reading check questions” (questions which ask students to look for discrete pieces of information) for this activity.

**Strategy:** Beyond “Right There” Questions

**Description:** The standards focus on students’ ability to read closely to determine what a text says explicitly and to make logical inferences from it. Rather than asking students questions about their prior knowledge or experience, the standards expect students to wrestle with text-dependent questions. These questions can only be answered by referring explicitly back to the text.

**Instructional Activity:** Teacher creates text-dependent questions that ask students to:

- Analyze paragraphs, sentences, and words
- Investigate how meaning can be altered by changing key words
- Analyze arguments, ideas in informational texts, and key details in literary texts
- Question why the author choose to begin and end when they do
- Consider what the text leaves uncertain or unstated

**Strategy:** Student-Generated Comprehension Questions

**Description:** Text-dependent questions keep reading and writing grounded in evidence from the text. These questions are typically generated by the teacher. Using this strategy, students take ownership of their learning by developing questions as they read the text closely.

**Instructional Activity:** 1) Choose an excerpt from a text that is complex and worthy of rereading. 2) The teacher reads the text aloud as students follow along. 3) Students reread the text silently and mark places where they are confused, have doubt, or wonder about something. 4) Ask students to reread the selection, stopping at the marked spots, and create a question. 5) Teacher collects and displays the questions. 6) In pairs, students look at the questions they find most important. 7) Students share out. 8) Teacher facilitates whole group discussion around the questions collected.

**Strategy:** Ask About It

**Description:** A number of researchers have argued and demonstrated that including discussion as part of a lesson leads to higher literacy performance. Giving students a chance to make inquiries of the text, the teacher, and each other can foster engagement and bolster literacy skills.

**Instructional Activity:** Have students read, view, or listen to a text. Ask them to write down, for later discussion, three focused questions relating to: 1) something they found confusing, 2) something that connects to another discipline or current event, and 3) something on which they want to hear someone else's view. Have students pose their questions to the class, making sure to ground them in the text itself, for a whole group discussion.

**Strategy:** Discuss It

**Description:** Ask students to answer thought-provoking, text-centered discussion questions. “High-quality discussion and exploration of ideas—not just the presentation of high-quality content by the teacher or text—are central to the developing understandings of readers and writers,” (Applebee, Langer, Nystrand, & Gamoran, p. 688). One important factor to keep in mind when creating discussion questions is that questions must be *both* answerable and discussable; questions that have a “right answer” lose discussion power very quickly. Consider this question: What is going on in the first paragraph? Once a student correctly identifies the goings-on of the first paragraph, “discussion” stops. Now consider this question: Why do you think [character] decides to [action]? Discussion may go on and on because of various interpretations, rationales, and inferences.

**Instructional Activity:** Have students read silently for about 10 minutes. If the text is a narrative piece, begin the discussion with this question: Why do you think [character] decides to [action]; what evidence is there to support your response? If the text is informational, begin the discussion by asking this: To what degree does [topic/issue] impact the average [citizen/teen]; would the author agree with you?

**Strategy:** Tentative Talk (Grand Conversations)

**Description:** Students engage in open-ended exchanges that allow them to build from one another's thoughts as they talk about text-related ideas. This helps teachers create scaffolded text-based discussions.

**Instructional Activity:** It is important to allow students to have informal discussions about text and their ideas. Teachers can scaffold discussions and return students back to the text by using questions such as: I am wondering if \_\_\_\_\_.; Can you share more about \_\_\_\_\_?; If what you said is true, then why would \_\_\_\_\_?

**Strategy:** Section It!

**Description:** This approach provides students with a structure for a text-based discussion. It provides questions readers can use to grapple with difficult text in a meaningful way. This strategy can be used with literary and informational texts.

**Instructional Activity:** Choose texts that incorporate complex ideas and concepts that will promote discussion and debate. Texts can include excerpts from opinion papers, newspaper articles, scientific reports, scholarly articles, personal essays, etc. Have students divide their paper into three or four sections and provide the headings for each that will frame the discussion. Invite students to read the selected text. After reading, students return to the text using the graphic organizer to guide their reading and later discussion. Some examples for sections might be: Ideas: What ideas do you think are the most important in the text? Importance: Why is this important in history? Opinion: In my opinion..... Student takes a position that is backed by examples and evidence. Identify: What passages in the text can you identify with and why? Teacher begins a discussion with the critical questions. Students engage in the discussion using their text-based evidence.

**Strategy:** Summarize It!

**Description:** Summarizing is a strategy in which readers identify main ideas and supporting details, then organize and combine the ideas to allow the understanding of the text to unfold.

**Instructional Activity:** Students write a summary of material read using these steps:

1. Identify or select the main information
2. Delete trivial information
3. Delete redundant information; and
4. Write a short synopsis of the main and supporting information for each paragraph

Additional ways to write summaries include: using only one sentence, using an outline; locating and using the main idea in each paragraph; using graphic organizers such as GIST (Generating Interactions between Schemata and Text).

**Strategy:** Dictogloss

**Description:** Dictogloss is a strategy that improves students' knowledge of text structure and grammar within an authentic context (Van Patten, Inclezan, Salazar, & Farley). The collaborative nature of Dictogloss allows all learners, but especially second-language learners and striving readers, to examine an exemplary narrative passage and discover how the author created it.

**Instructional Activity:** Choose a rich, short, cohesive text. Read the text to the students once through at normal speed, students listen but don't write anything. Read the text again at normal speed, pausing after each sentence to give time for students to make brief notes. Then ask the students to expand their notes. Next, in pairs or groups, the students collaborate to produce their own version of what they heard. (The aim is not to reproduce the text word for word, but to convey the meaning and style of the text as closely as possible.) Pairs or groups then compare their texts with the original text in order to justify the differences between them.

**Strategy:** Writer's View (Map the Text)

**Description:** Using collaborative discussion to evaluate a writer's (or speaker's) viewpoint offers students an opportunity to practice speaking and listening skills while closely examining a text and offering text-dependent support of their arguments.

**Instructional Activity:** Select a short informational text for students to read (or listen to) silently. Ask students to note the ways in which the author conveys his/her point of view and annotate using the following steps: 1) Circle statements that reveal the author's viewpoint/opinion. 2) Draw arrows to statements that convey or support each circled viewpoint. 3) Next to each arrow, explain whether or not the opinion/stance is appropriately presented or supported (through the use of diction, figurative language, organization, etc.). After students have had time to read and annotate, have them break into small groups to discuss their annotations.

**Description:** Frame the Argument serves as a scaffolding tool for students learning to read and write arguments using open ended sentence stems (language frames). Teachers provide students with language frames to guide and frame their thinking after reading an argument text or when preparing to write an argument.

**Instructional Activity:** Ask students to complete one of the following language frames:

- In discussions about \_\_\_\_\_, one issue has been \_\_\_\_\_. People who believe \_\_\_\_\_ claim that \_\_\_\_\_. On the other hand, those who believe \_\_\_\_\_ contend that \_\_\_\_\_. My own view is \_\_\_\_\_.
- When it comes to the topic of \_\_\_\_\_, most of us would agree that \_\_\_\_\_. Where this agreement ends, however, is on the question of \_\_\_\_\_. Whereas some are convinced that \_\_\_\_\_. Others maintain that \_\_\_\_\_. My own view is that \_\_\_\_\_.

**Strategy:** Is this Legit?

**Description:** For this strategy, students explore the evidence in a speech. One way in which teachers can help students understand how to support their own arguments is to have them explore the validity of the evidence that others use. Have students: 1) identify the evidence, 2) determine the type of evidence (logical, emotional, persuasive, etc.), and 3) discern the credibility of the evidence.

**Instructional Activity:** Find two audio recordings of speeches (of no more than 7 minutes each) wherein the speakers take opposing sides (e.g., presidential or gubernatorial debate). Ask students to just listen the first time through. As the speeches play a second time, ask students to take note of what evidence the speakers use to support their points. Following this, have students break into small groups to discuss the types of evidence used and to discern the credibility of the evidence.

**Instructional Activity:** 1) Teacher chooses a rich text worthy of rereading and provides multiple opportunities for students to engage in the text. (Read Aloud, Read Silently, Rehearsal or Partner Reading, Chunking, and Annotating the Text) 2) Provide students with a double entry journal with pertinent phrases from the text that could unveil its title. 3) Students use the journal to take notes as they read. 4) Ask students to create a title for the text and write an explanation or rationale using evidence found in the text.

**Strategy:** Headlines

**Description:** This strategy asks students to reflect and synthesize as they identify the big ideas and important themes in what they have been learning about in texts they are reading.

**Instructional Activity:** After students have read a text (literary or informational), ask them to consider the core ideas. 2) Write a headline for the topic or issue that captures an important aspect or core idea. 3) Students share the headline with a partner or small group, including the story and reasoning behind their choices. 4) Teacher creates a class collection of the headlines that documents the group's thinking.

**Variation activity:** Exploring Literary Themes with "Headlines"

1) Choose a rich literary text for students to read. 2) After reading, ask students to name songs from their mp3 players that would best capture a central theme from the novel they are reading, explaining and justifying their choices. 3) Class listens to the mix of song selections and reflects on how they portray the central theme.

**Strategy:** Sentence-Phrase-Word (Text Rendering)

**Description:** Sentence-Phrase-Word is a method of deconstructing text by strategically choosing a sentence, phrase, and word after careful analysis of the overall structure of the text. This practice serves as a formative assessment tool to determine how the students comprehend the text. The teacher can adjust discussion to ensure that misconceptions are quickly addressed, allowing more time for discussing the central ideas.

**Instructional Activity:** The teacher reads aloud as the students read/follow silently. Students reread the text silently and underline or highlight the following: 1) A sentence that they feel captures a central idea of the text and/or is meaningful to understanding the text. 2) A phrase that demonstrates powerful language - author's craft. 3) A single word the author chose that they found particularly effective. In small groups, students share, discuss, and record their choices. Students explain why they chose their sentences, phrases, and words. In a whole group discussion, reflect by identifying commonalities, differences, and what was not captured in their choices.

**Strategy:** Table It

**Description:** Reading a text is one thing. Being able to understand, explain, and even utilize the information contained therein is another. Converting the data presented in prose allows students to read deeply for relevant information while exploring various methods of presenting an argument or message.

**Instructional Activity:** Ask students to find a text in which the author presents quantitative information primarily through prose. Pair students and have them share their resources with each other, ultimately choosing one text with which to work. Working together, they should decide how best to present the quantitative information tabularly (i.e., what sort of table, diagram, or other graphic to use). After completing this, have students briefly present their conversion to the rest of the class, justifying their choice of graphic (how it adds to the understanding of the information being presented).

**Strategy:** Present It

**Description:** One of the best and easiest ways in which teachers can integrate Common Core Speaking and Listening Standards and encourage students to read deeply is to set aside time for students to give presentations on various topics throughout the school year.

**Instructional Activity:** Ask students to select topics of their choosing which are relevant to current local, national, or global events. Students will choose, explore, and synthesize a minimum of five credible sources (preferably from varying media) pertaining to their chosen topics. Have students prepare presentations (of at least five minutes) on the topics in which they 1) explain the topic, 2) synthesize resources, 3) offer their own points of view, 4) utilize technology to enhance their presentations, and 5) knowledgably answer questions from the audience.

**Strategy:** Mode Translation (Text Reformulation)

**Description:** Various researchers have asserted that the skill of translating one form of text into another (e.g., translating poetry into painting) is the most valuable skill that students can learn because they must delve deeply into the text and fully understand all aspects of it before they are able to properly reformulate (or “translate”) it.

**Instructional Activity:** First, choose a pair of texts of which one is a reformulation/translation of the other. For example, *The Lady of Shallot* (poem by Tennyson and two paintings by Waterhouse). Have students examine and discuss the texts. After students have had an adequate amount of time to explore the example, have them try it out. Give the students a short prose piece and ask them to translate/reformulate the text. They should be allowed to choose the reformulation mode (e.g., pictures, song, music, dance, etc.). In elementary grades, students could discuss the connection between the story and its illustrations. Also, elementary students could create their own illustrations to add to the meaning of a story.

**Description:** Recasting your text is a strategy in which students transform a text into a different genre. Students can turn informational texts into narratives, speeches into editorials, or short stories into picture books.

**Instructional Activity:** After students have a strong grasp on the overall meaning of the text, ask students to convert it into another genre. The new text should reflect the author's point of view and intent of the original text. Recasting requires students to read for a purpose; to identify important details (main idea, relationships, or sequencing) that will inform how to write the new text in a different genre.

**Instructional Activity:** Identify a topic for consideration which is fairly arguable. Select three informational texts which explore the issue: 1) newspaper/magazine article, 2) short video clip, and 3) political cartoon. Have students read/view each piece, asking them to annotate and question the text. Once they have finished going through the three texts, have students transfer their annotations/thoughts to a three-column graphic organizer. **Description:** One way to make a text relevant for students is to have them respond to it. Providing an audience other than the teacher or the rest of the class allows students to adapt to various audiences and affords them a bit of novelty in their writing tasks.

**Instructional Activity:** Have students read through various articles from a local newspaper. After reading and annotating them, students should choose one to which they will respond. Have students compose a letter to the editor (of the same newspaper from which the article came) according to the editor’s guidelines in which they either 1) address and explain flaws and fallacies or 2) summarize and emphasize strengths and well-supported points in the original article. Elementary students should include their own opinions on the topic, supporting a point of view with reasons and information.

**Strategy:** Step Inside (Circle of Viewpoints)

**Description:** This strategy helps students consider other people’s viewpoints and perspectives around a topic in a text. It requires students to solely rely on information found in the text without making text-to-self connections. Stepping inside a person, character, or object, students analyze how point of view shapes understanding of events in a text.

**Instructional Activity:** Choose a person, character, or object (personifying it) in a text you are reading. Place yourself within the event or situation to view things from that perspective. Some questions to consider include: What do you now observe? What now do you know to be true? What do you now question?

**Strategy:** Self Discovery

**Description:** Themes and topics uncovered in literary texts often connect to real life events and experiences. When a topic surfaces that is of interest to the students, let them conduct research in and outside of class. The intent is to provide students with time to investigate details, articulate initial ideas with new understandings, and to determine a focus for further inquiry about the topic.

**Instructional Activity:** As students read have them keep a journal of possible research topics. These topics are generated by students based on interest and inspired by texts they have read. On designated days, teachers allow students to review their journals and choose a topic that they would like to investigate further. Students may also fill out a graphic organizer called "I'd Like to Know More About...". As data is collected, students begin to narrow their focus of inquiry. At the elementary level, students can write or draw questions and topics on index cards and store in a recipe box.

**Strategy:** Grammar in Context

**Description:** Teaching grammar instruction in the context of the writing process improves fluency and comprehension (Graham & Hebert).

**Instructional Activity:** Using Mentor Texts to Teach Sentence Combining

1) Choose a rich piece of writing (mentor text). 2) Have students highlight or circle how the author uses punctuation to combine sentences and phrases. 3) Analyze the types of sentences the author uses. (Are they simple, compound, complex, compound-complex?) 4) Using a piece of their own writing, students note and annotate their use of punctuation for effect and combine sentences.

This activity could be repeated, highlighting other areas of need. Teachers choose mentor texts that provide excellent examples of grammatical concepts, study and discuss the mentor text as a model, and have students practice with their own writing.

## 40 Ways to Read Like a Detective:

# 38

**Strategy:** Text Impressions

**Description:** This strategy helps students become familiar with discipline specific vocabulary (Tier 3 Words) by reading words and phrases the teacher strategically chooses from the text they are about to read. Students use the words and phrases to make predictions. Text Impressions help students stay grounded in the text before, during, and after reading and uses informational texts only.

**Instructional Activity:** 1) Teacher makes a list of 8-10 words that are integral to the meaning of the text. (List words in the order they appear in the text.) 2) Students write a summary based on their predictions using all the words listed. 3) Then, ask students to “think silently” as they read, making comparisons with the reading and their initial predictions. 4) Engage students in a whole class discussion identifying similarities and differences with the text and their predictions. 5) Ask students to write a new summary, using the same list of words, sequencing the events described in the text.

**40 Ways to Read Like a Detective: # 39**

**Strategy:** Academic Vocabulary—Elementary

**Description:** Tier Two words (what the Standards refer to as general academic words) are far more likely to appear in written texts than in speech. They appear in all sorts of texts: informational texts (words such as relative, vary, formulate, specificity, and accumulate), technical texts (calibrate, itemize, periphery), and literary texts (misfortune, dignified, faltered, unabashedly). Tier Two words often represent subtle or precise ways to say relatively simple things—*saunter* instead of *walk*, for example. Because Tier Two words are found across many types of texts, they are highly generalizable. (CCSS: Appendix A, 33)

**Instructional Activity:** Teacher chooses a rich text and selects the Tier Two words. Refer to the rubric to determine which ones to teach. Now, follow this sequence: Read the text. Contextualize the word within the story. Have students say the word. Provide a student-friendly explanation of the word. Present examples of the word in contexts different from the story context. Engage students in activities that get them to interact with the words. Have students say the word.

**Strategy:** Academic Vocabulary—Secondary

**Description:** Tier Two words (what the Standards refer to as general academic words) are far more likely to appear in written texts than in speech. They appear in all sorts of texts: informational texts (words such as relative, vary, formulate, specificity, and accumulate), technical texts (calibrate, itemize, periphery), and literary texts (misfortune, dignified, faltered, unabashedly). Tier Two words often represent subtle or precise ways to say relatively simple things—*saunter* instead of *walk*, for example. Because Tier Two words are found across many types of texts, they are highly generalizable. (CCSS: Appendix A, 33)

**Instructional Activity:** Relationships among words: Teacher chooses a rich text and selects 5-10 Tier Two words. Develop definitions for the words. Then, pair the words in a question format, so students have to consider how meanings interact in order to respond to the question. For example: Would you *suppress* a *profound* thought? Even though this can be answered with *yes* or *no*, accept either as long as it can be justified. By making these connections, students are better able to derive meaning from the contexts in which the words are used.

### Making Annotations: A User's Guide

As you work with your text, consider all of the ways that you can connect with what you are reading. Here are some suggestions that will help you with your annotations:

- Define words or slang; make the words real with examples from your experiences; explore why the author would have used a particular word or phrase.
- Make connections to other parts of the book. Feel free to use direct quotes from the book.
- Make connections to other texts you have read or seen, including:
  - Movies
  - Comic books/graphic novels
  - News events
  - Other books, stories, plays, songs, or poems
- Draw a picture when a visual connection is appropriate.
- Re-write, paraphrase, or summarize a particularly difficult passage or moment.
- Make meaningful connections to your own life experiences.
- Describe a new perspective you may now have.
- Explain the historical context or traditions/social customs that are used in the passage.
- Offer an analysis or interpretation of what is happening in the text.
- Point out and discuss literary techniques that the author is using.
