Shelby County Schools

Fitness and Conditioning

Curriculum

Shelby County Schools

2015-2016
In 2014, the Shelby County Schools Board of Education adopted a set of ambitious, yet attainable goals for school and student performance. The District is committed to these goals, as further described in our strategic plan, Destination 2025.

**By 2025,**

- 80% of our students will graduate from high school college or career ready
- 90% of students will graduate on time
- 100% of our students who graduate college or career ready will enroll in a post-secondary opportunity.

In order to achieve these ambitious goals, we must collectively work to provide our students with high-quality, College and Career Ready standards-aligned instruction. Acknowledging the need to develop competence in literacy and language as the foundations for all learning, Shelby County Schools developed the Comprehensive Literacy Improvement Plan (CLIP) and the SCS Curriculum Maps for Arts Education.

Designed with the teacher in mind, the Health, Physical Education and Lifetime Wellness (HPELW) curriculum maps focus on teaching and learning in the domains of Perform, Create, Respond, and Connect. This map presents a framework for organizing instruction around the TN State Standards so that every student meets or exceeds requirements for college and career readiness. The standards define what to teach at specific grade levels, and the SCS HPELW Education curriculum maps provide guidelines and research-based approaches for implementing instruction to ensure students achieve their highest potentials.

The SCS HPELW Education curriculum maps are designed to create physically literate students by engaging them both individually and collaboratively in creative practices of applying, creating, communicating, collaborating and reflecting. To achieve these goals the curriculum maps were developed by expert arts teachers to reflect the conceptual framework of the four artistic processes: present, create, respond, and connect.

**How to Use the HPELW Education Curriculum Maps**

The SCS HPELW Education curriculum maps are designed to help teachers make effective decisions about what content to teach and how to teach it so that, ultimately, our students can reach Destination 2025. Across all HPELW disciplines, this is generally reflected in the following quarterly framework:

**Course description**- This reflects the primary goals of the students to master basic skills and concepts that build upon previous knowledge which occurs as a result of physical activity.
State Standards: Students will be introduced to the following areas: movement, movement concepts, physical activity, fitness and personal/social responsibilities.

Essential Learnings: This section focuses on student outcomes and expectations.

Effective Components of HPELW: This section provides State and Local laws,

Assessments: The educator will provide students with content, skill topics, SPIs and suggested timelines, with the appropriate assessment strategy; pre and post skill assessment, teacher observation, product and performance, self analysis, oral and or cognitive quizzes, fitness gram, pacer, student-lead peer modeling, peer observation and portfolio student growth measures.

Physical Education Vocabulary Terms: Educators are provided grade appropriate and content specific terminology used within a HPELW classroom

Essential Guiding Questions: Generally phrased similar to “I Can” statements, this portion identifies the specific performance indicators that are expected for students at a given time within the quarters/semester.

Tennessee-Shelby County Content Standards per grade band.

HPELW Quarterly Pacing Guides: SPIs, suggested timelines content skill, topic and task.

Sample Games and Activities with Literacy connections

Resources And Interdisciplinary Connections - In this column, teachers will find rich bodies of instructional resources/materials/links to help students efficiently and effectively learn the content. Additionally, there are significant resources to engage alignment with the Comprehensive Literacy Improvement Plan (CLIP) and HPELW activities are designed to strengthen authentic development of communication, listening, research, collaboration and content reading literacy in HPELW in supporting the District’ goals for improving student literacy.

Throughout this curriculum map, you will see high-quality activities, strategies and resources to support in ensure that students are able to reach the demands of the standards in the classroom. In addition to the resources embedded in the map, there are some high-leverage (technology, online) resources available for teacher use.

National Standards for K-12 Physical Education

The goal of physical education is to develop physically literate individuals who have the knowledge, skills and confidence to enjoy a lifetime of healthful physical activity.

To pursue a lifetime of healthful physical activity, a *physically literate individual*:
• Has learned the skills necessary to participate in a variety of physical activities.
• Knows the implications and the benefits of involvement in various types of physical activities.
• Participates regularly in physical activity.
• Is physically fit.
• Values physical activity and its contributions to a healthful lifestyle.

**Standard 1.** The physically literate individual demonstrates competency in a variety of motor skills and movement patterns.

**Standard 2.** The physically literate individual applies knowledge of concepts, principles, strategies and tactics related to movement and performance.

**Standard 3.** The physically literate individual demonstrates the knowledge and skills to achieve and maintain a health-enhancing level of physical activity and fitness.

**Standard 4.** The physically literate individual exhibits responsible personal and social behavior that respects self and others.

**Standard 5.** The physically literate individual recognizes the value of physical activity for health, enjoyment, challenge, self-expression and/or social interaction.

**Diamond Conceptual Framework: A K-12 Road Map for Physical Education**
The diamond shape helps illustrate the progression of skills and concepts taught in physical education, which are guided by national and state standards and research on physical activity and physical education.

Students should first learn the fundamental skills needed to be successful in physical activities, just as they would need to learn to read before tackling Mark Twain. Next they should experience a variety of activities with the goal of finding a few they enjoy. We wouldn’t want them to go through life thinking the only way to stay healthy and fit is by running, playing basketball, and/or lifting weights. Lastly, we want them to become proficient in a few chosen activities with the hope that they will continue to participate in them throughout their lives.
Fitness and Conditioning Course Overview

Course Description

Students will be able to develop an understanding of fitness concepts and design personal fitness program while developing an individualized level of health-related activities to complete assessments of their health related fitness. Students will learn the relationships between physical activity, physical fitness, group interaction, cooperation, an appreciation for the abilities and limitations of self and others and various health-related outcomes. Through the course, students will gain knowledge and skills needed to develop lifelong pattern of physical activity. By the end of the course students will: improve their physical fitness by participating in group fitness classes, weight training, walking, jogging, aquatic fitness, nutrition and other activities.

Effective Components of Fitness and conditioning:
- Students will improve their Cardiovascular Endurance, Muscular Strength, Muscular Endurance and Flexibility/Mobility.
- Students will develop knowledge of and competency of variety of fitness activities.
- Students will continually improve their listening, speaking, reading, writing skills as they demonstrate their knowledge through fitness and individual activities.
- Teacher provides a maximum participation for all students.
- Provides positive, specific feedback.
- Provides awareness of the community resources, needs, and health related issues that are facing out youth today.
Provides the students with knowledge of creating their personal fitness plan, to get desired results and meet their goals. Students will make healthy life long fitness choices that will be incorporated into their daily lives.

TN State Standards
1. Movement
2. Movement Concepts and Principles
3. Physical Activity
4. Fitness
5. Personal and Social Responsibility

ESSENTIAL LEARNINGS
1. A. Demonstrate the ability the apply advanced motor skills and movement
2. Patterns relative to advanced eye-hand/foot coordination and high levels of strategy
3. Demonstrate proficient movement patterns in a variety of physical
4. Activities (e.g., aquatics, dance and rhythms, individual, dual, and team sports, fitness activities) strategies in a variety of physical activities.
5. Analyze biomechanical principles while performing physical activities. (e.g., analysis of a tennis swing, analysis of shooting a basketball)
6. Participates in aerobic exercise at medium effort, continuously for an extended period of time

Assessments
Pre and Post Skill Assessments Rubrics
Teacher Observation Conferencing
Product/Performances Peer Observation
Self-Analysis FitnessGram Testing
Student-led Peer Modeling Portfolios
Oral and/or Cognitive Quizzes

TN State Standards
1. Movement
2. Movement Concepts and Principles
3. Physical Activity
4. Fitness
5. Personal and Social Responsibility
Standard 1:
Motor Skill and Movement Patterns: Demonstrate competency in basic and advanced skills and tactics in at least one activity from each of three of the following categories: Cardiovascular endurance, Muscular strength, muscular endurance, flexibility, body composition.

Essential Learning:
1.3.1 demonstrate the ability to apply advanced motor skills and movement patterns relative to advanced eye-hand/foot coordination and high levels of strategy.
1.3.2 demonstrate proficient movement patterns in a variety of physical activities (e.g., aquatics, dance and rhythms, individual, dual, and team sports, fitness activities).
1.3.3 exhibit advanced offensive, defensive and transition strategies in a variety of physical activities.
1.3.4 analyze biomechanical principles while performing physical activities. (e.g., analysis of a tennis swing, analysis of shooting a basketball).

Standard 2:
Demonstrates understanding of movement concepts, principles, strategies, and tactics as they apply to the learning and performance of physical activities.

Essential Learning:
Apply concepts and principles of human movement to the development of motor skills and the learning of new skills.
2.3.5 Assess strategies needed to achieve specific effects/outcomes in a variety of physical activities.
2.5 All students will utilize safe, efficient, and effective movement to develop and maintain a healthy, active lifestyle.

2.6 Fitness: All students will apply health-related and skill-related fitness healthy, active lifestyle concepts and skills to develop and maintain.

Standard 3:
Essential Learning:
3.3.1 monitor physical activity through the use of a pedometer, heart rate monitor, and/or physical activity log or other appropriate technology.
3.3.2 accumulate on most days a recommended number of minutes of moderate to vigorous physical activity outside of physical education class.
3.3.3 understand the ways in which personal characteristics, personal lifestyles, and activity preferences will change over a lifespan.
3.3.4 analyze the benefits of regular participation in physical activity (e.g., explain the benefits of exercise how it relates to stress management).
3.3.5 refine skills, expand knowledge, cultivate interests, and strengthened.

Standard 4:
A physically educated person achieves and maintains a health-enhancing level of physical fitness.

Essential Learning:
4.3.1 practice skills associated with different health-related fitness activities.
4.2.4 differentiate aerobic and anaerobic exercise and provide examples of each.
4.1.6 describe the social, emotional, mental and physical benefits of being physically fit.
4.2.5 identify and define concepts of health-related physical fitness (i.e., cardiovascular endurance, muscular endurance, muscular strength, flexibility and body composition).

Standard 5:
A physically educated person exhibits responsible personal and social behavior that respects self and others in physical activity settings.

Essential Learning:
5.1.1 - follow, with few reminders, activity-specific rules and procedures.
5.1.4 - cooperate with others regardless of personal differences in skill, gender, disability, socioeconomic level and ethnicity.
5.2.7 - understand and demonstrate the importance of team work, sportsmanship and fair play.
5.2.9 - participates in socially acceptable ways.
5.3.1 - seek leadership opportunities in physical activity settings.
Overarching Enduring Understandings

• The students will understand that by learning and participating in lifetime and individual activities, they are building a basis to maintain a happy and healthy lifestyle in the future.
• The students will understand that they will be able to stay active in other ways than team sports. Grades 9-12: Student expectations (at the end of grade 12)
• High school students are more comfortable with their new interests and their physiques, thus once again enjoying movement for the sheer pleasure of moving.
• The students enjoy the challenge of working hard to better their skills, and they feel satisfaction when they are successful in improving, especially while pursuing personal goals.
• The students enjoy regular participation in selected activities,

Integration & Information Literacy

• Shares knowledge and information with others.
• Draws conclusions.
• Pedometers and heart rate monitors are used to monitor physical activity.
• Tracks physical activity on fitness websites such as "Let's Move Active School" and other integration activities.

<tr>
<td>Overall Focus- Go over study guides and terminology.</td>
<td></td>
</tr>
</tbody>
</table>

**Notes:**
- **Safety!** indicates a focus on safety in the exercises.
- **Study Guides and Terminology:** Review and discuss study sheets regularly.

---

**Summary:**
- The Fitness and Conditioning program at Shelby County Schools for the 2015-2016 academic year aimed at improving overall fitness through various activities.
- The program emphasized safety and supervision to ensure a secure environment.
- Progress was monitored through charts of progress, focusing on metrics such as body fat and pre/post test max's.
- Regular sessions were scheduled to discuss students' progress and causes behind their performance.
- The program included a mix of group work, individual work, and supervision to maximize learning and physical development.

**Key Points:**
- **16th Week:** Focus on post-test, checking students' 3RM (3 rep max) and review progress.
- **17th Week:** Personal trainer and routine designer demonstrated improved fitness levels.
- **18th Week:** Make up physical testing work, clean up, and wrap up, preparing for final exams.

<td><strong>Muscular Anatomy</strong></td>
<td>The <strong>muscular system</strong> is an organ <strong>system</strong> consisting of skeletal, smooth and cardiac <strong>muscles</strong>. It permits movement of the <strong>body</strong>, maintains posture, and circulates blood.</td>
</tr>
<tr>
<td>----------------------</td>
<td>--------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td><strong>Target Heart rate</strong></td>
<td>The minimum number of heartbeats in a given amount of time in order to reach the level of cardiovascular fitness.</td>
</tr>
<tr>
<td><strong>Aerobic Activities</strong></td>
<td>Any of various sustained exercises, as jogging, rowing, swimming, or cycling, that stimulate and strengthen the heart and lungs, thereby improving the body's utilization of oxygen.</td>
</tr>
<tr>
<td><strong>Cardiovascular endurance</strong></td>
<td>The power, strength or the ability of the heart to supply enough oxygen to muscles during a physical activity for a prolonged period of time.</td>
</tr>
<tr>
<td><strong>Muscular Endurance</strong></td>
<td>The ability of a <strong>muscle</strong> or group of muscles to sustain repeated contractions against a resistance for an extended period of time.</td>
</tr>
<tr>
<td><strong>Muscular strength</strong></td>
<td>The maximum force that can be generated by a <strong>muscle</strong> or muscle groups in one singular contraction.</td>
</tr>
<tr>
<td><strong>Flexibility</strong></td>
<td>The absolute range of movement in a joint or series of joints, and length in muscles that cross the joints.</td>
</tr>
<tr>
<td>-----------------</td>
<td>-------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td><strong>Body Composition</strong></td>
<td>The proportion of fat and fat-free mass in the body.</td>
</tr>
<tr>
<td><strong>Cardiovascular Conditioning</strong></td>
<td>Enhancement of heart and circulatory function produced by regular vigorous aerobic exercise, as jogging, swimming, or cycling.</td>
</tr>
<tr>
<td><strong>Circuit Training</strong></td>
<td>Is a form of body conditioning or resistance training using high-intensity aerobics. It targets strength building and muscular endurance.</td>
</tr>
<tr>
<td><strong>Static Stretching</strong></td>
<td>The placement of muscles and connective tissues at their greatest length by steady force in the direction of lengthening.</td>
</tr>
<tr>
<td><strong>Eustress</strong></td>
<td>Stress that is deemed healthful or giving one the feeling of fulfillment</td>
</tr>
<tr>
<td><strong>Interval Training</strong></td>
<td>Mixture of aerobic and nonaerobic exercise</td>
</tr>
<tr>
<td><strong>Joints</strong></td>
<td>Junction between bones: a part of the body where bones are connected.</td>
</tr>
<tr>
<td><strong>Ligament</strong></td>
<td>The fibrous tissue that connects bones to other bones.</td>
</tr>
<tr>
<td><strong>Muscles</strong></td>
<td>Body tissue producing movement: a tissue that can undergo repeated contraction and relaxation, so that it is able to</td>
</tr>
<tr>
<td><strong>Shelby County Schools</strong></td>
<td><strong>Fitness and Conditioning</strong></td>
</tr>
<tr>
<td>--------------------------</td>
<td>-------------------------------</td>
</tr>
<tr>
<td>produce movement of body parts, maintain tension, or pump fluids within the body.</td>
<td></td>
</tr>
<tr>
<td><strong>Aerobic Capacity</strong></td>
<td>The maximal amount of physiologic work that an individual can do as measured by oxygen consumption.</td>
</tr>
<tr>
<td><strong>Pacing</strong></td>
<td>A rate of movement, especially in stepping, walking, running, etc.</td>
</tr>
<tr>
<td><strong>Aerobic Capacity</strong></td>
<td>The measure of the ability of the heart and lungs to get oxygen to the muscles.</td>
</tr>
<tr>
<td><strong>Static Stretching</strong></td>
<td>Technique in which an extreme stretched position is slowly reached, then held for some time.</td>
</tr>
<tr>
<td><strong>FITT Principle</strong></td>
<td>The F.I.T.T. a set of guidelines that help you set up a workout routine to fit your goals and fitness level while helping you get the most out of your exercise program. Frequency, Intensity, Time and Type.</td>
</tr>
<tr>
<td><strong>Body Mass Index</strong></td>
<td>An index for assessing overweight and underweight, obtained by dividing body weight in kilograms by height in meters squared.</td>
</tr>
<tr>
<td><strong>Stress</strong></td>
<td>Strain felt by somebody: mental, emotional, or physical strain caused, e.g. by anxiety or overwork. It may cause such symptoms as raised blood pressure.</td>
</tr>
<tr>
<td>Shelby County Schools</td>
<td>Fitness and Conditioning</td>
</tr>
<tr>
<td>----------------------</td>
<td>--------------------------</td>
</tr>
<tr>
<td><strong>Principles of Training</strong></td>
<td>Principle of training that states that sports training should be relevant and appropriate to the sport for which the individual is training in order to produce a training effect.</td>
</tr>
<tr>
<td><strong>Overload</strong></td>
<td>The <strong>Overload</strong> Principle guides how to increase <em>training</em> loads for best results in fitness <em>training</em>.</td>
</tr>
<tr>
<td><strong>Progression</strong></td>
<td>The principle of <strong>progression</strong> assumes a person's exercise performance should be at full capacity within a specific time window to see improvement.</td>
</tr>
<tr>
<td><strong>Specificity</strong></td>
<td>Concept that specific exercise elicits specific adaptations, creating specific training effects.</td>
</tr>
<tr>
<td><strong>Recovery</strong></td>
<td>The term “training recovery” is used to describe the recovery between workout sessions or athletic competitions.</td>
</tr>
<tr>
<td><strong>Heart Rate</strong></td>
<td>A measure of cardiac activity usually expressed as number of beats per minute.</td>
</tr>
<tr>
<td><strong>Resting Heart Rate</strong></td>
<td>The basal or resting heart rate is measured while the subject is relaxed but awake, in a neutrally temperate environment, and not having recently exerted himself or herself nor having been subject to a stress or even a surprise</td>
</tr>

</tr>
</thead>
<tbody>
<tr>
<td>Component 2.1 Understands dimensions and indicators of health.</td>
<td>SL.9-10.5 Make strategic use of digital media (e.g., textual, graphical, audio, visual, and interactive elements) in presentations to enhance understanding of findings, reasoning, and evidence and to add interest.</td>
<td>GLE 2.1.1 Evaluates dimensions of health and relates to personal health behaviors. Using text and the internet, gather evidence that supports the correlation between the consumption of supersized portions and obesity. Students create a power point illustrating their findings.</td>
</tr>
<tr>
<td>Component 2.2 Understands stages of growth and development.</td>
<td>RST.9-10.2 Determine the central ideas or conclusions of a text; trace the text's explanation or depiction of a complex process, phenomenon, or concept; provide an accurate summary of the text.</td>
<td>GLE.2.3.2 Analyzes personal health practices and how they affect non-communicable diseases. Students research a non-communicable disease using at least 3 sources then create a brochure outlining, causes, affects and prevention.</td>
</tr>
<tr>
<td>Component 2.4 Acquires skills to live safely and reduce health risks.</td>
<td>SL.9-10.4 Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.</td>
<td>GLE 2.4.3 Analyzes stress and how it relates to personal stress-management strategies. Student creates and performs a skit on effective stress management techniques identifying the signs and symptoms of stress, coping strategies and community resources to access help. (Relates to HS OSPI Developed Assessment; “Dear Stressed and Depressed”)</td>
</tr>
</tbody>
</table>

Connections to English Language Arts, Grade 9-10

EALR 3: The student analyzes and evaluates the impact of real-life influences on health.
Component 3.2 Evaluates health and fitness information.

**WHST.9-10.7** Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.

**GLE 3.2.1** Evaluates health and fitness information. Evaluate three diet plans from a teacher generated list. Document the pros and cons in all three to determine the best option for long term health benefits.

Component 3.3 Evaluates the impact of social skills on health.

**W.9-10.3** Write narratives to develop real or imagined experiences or events using effective technique, well-chosen details, and well structured event sequences.

**GLE 3.3.1** Analyzes conflict situations. Students create a narrative for a skit on demonstrating effective conflict resolution skills. (Relates to HS OSPI Developed Assessment; “Cut Out Conflict”)

**Connections to English Language Arts, Grade 9-10**

**EALR 4:** The student effectively analyzes personal information to develop individualized health and fitness plans.

30 Skill-Building Reproducible Pages That Prepare Kids for Standardized Tests by Michael Priestley

Physical Education is a CURRICULUM that helps to create and support physical activity.

A Quality physical education program leads to a lifetime of physical activity.
Physical Education is collaboration between aligned Instruction, Curriculum and Assessment.

Physical inactivity is part of the problem of overweight youth.
Physical activity is part of the solution.
Physical education is a critical component to increasing physical activity.

School physical education programs are the one place where:

- All children can participate in regular physical activity.
- All children can become physically educated for a lifetime of physical activity.
