Curriculum and Instruction – Mathematics

Quarter 4

Applied Mathematical Concepts

Introduction

Destination 2025, Shelby County Schools’ 10-year strategic plan, is designed not only to improve the quality of public education, but also to create a more knowledgeable, productive workforce and ultimately benefit our entire community.

What will success look like?

In order to achieve these ambitious goals, we must collectively work to provide our students with high quality, college and career ready aligned instruction. The Tennessee State Standards provide a common set of expectations for what students will know and be able to do at the end of a grade. The State of Tennessee provides two sets of standards, which include the Standards for Mathematical Content and The Standards for Mathematical Practice. The Content Standards set high expectations for all students to ensure that Tennessee graduates are prepared to meet the rigorous demands of mathematical understanding for college and career. The eight Standards for Mathematical Practice describe the varieties of expertise, habits of mind, and productive dispositions that educators seek to develop in all students. The Tennessee State Standards also represent three fundamental shifts in mathematics instruction: **focus, coherence and rigor**.

Instructional Shifts for Mathematics

Throughout this curriculum map, you will see resources as well as links to tasks that will support you in ensuring that students are able to reach the demands of the standards in your classroom. In addition to the resources embedded in the map, there are some high-leverage resources around the content standards and mathematical practice standards that teachers should consistently access. For a full description of each, click on the links below.

How to Use the Maps

Overview

An overview is provided for each quarter and includes the topics, focus standards, intended rigor of the standards and foundational skills needed for success of those standards.

Your curriculum map contains four columns that each highlight specific instructional components. Use the details below as a guide for information included in each column.

Tennessee State Standards

TN State Standards are located in the left column. Each content standard is identified as Major Content or Supporting Content (for Algebra I, Algebra II & Geometry only). A key can be found at the bottom of the map.

Content

This section contains learning objectives based upon the TN State Standards. Best practices tell us that clearly communicating measurable objectives lead to greater student understanding. Additionally, essential questions are provided to guide student exploration and inquiry.

Instructional Support & Resources

District and web-based resources have been provided in the Instructional Support & Resources columns. You will find a variety of instructional resources that align with the content standards. The additional resources provided should be used as needed for content support and scaffolding. The inclusion of vocabulary serves as a resource for teacher planning and for building a common language across K-12 mathematics. One of the goals for Tennessee State Standards is to create a common language, and the expectation is that teachers will embed this language throughout their daily lessons.

Curriculum and Instruction – Mathematics

Quarter 4

Applied Mathematical Concepts

Topics Addressed in Quarter

- Financial Mathematics (continued)
- Logic
- Boolean Algebra

Overview

In this quarter students begin by finishing their study of solving real-world problems involving finance. Students then formally study a small part of the subject of the field of logic- some basic notions that are fundamental in mathematics and law which require clear statements. Students will be introduced to mathematical arguments and develop tools to prove these arguments. Students also examine the notion of conjecture and study conjectures. Lastly students will examine the basic properties of Boolean algebra.

TN STATE STANDARDS	CONTENT	INSTRUCTIONAL SUPPORT & RESOURCES
Financial Mathematics (continued from Quarter 3) (Allow approximately 1-2 weeks for instruction, review, and assessment)		
<i>Continued from Quarter 3 (see standards from quarter 3)</i>	Objective(s): The student will: <ul style="list-style-type: none"> • Solve real-world problems involving the mathematics of finance. 	<i>Continued from Quarter 3</i> Financial Math Lessons Georgia Virtual Learning (Mathematics of Finance) Foundations U (Activities, Tools, Articles) Comap - A Course in Financial Mathematics (request access at http://www.comap.com/FloydVest/index.html) This is a free course in financial mathematics for upper high school and undergraduate students, with emphasis on personal finance. Financial Math Financial Math Comprehensive Curriculum Units 1- 5 Black Line Masters Financial Math Units 6-10 5 Black Line Masters Financial Math
