# Curriculum and Instruction – Mathematics

Quarter 3

Grade 8

## Introduction

Destination 2025, Shelby County Schools' 10-year strategic plan, is designed not only to improve the quality of public education, but also to create a more knowledgeable, productive workforce and ultimately benefit our entire community. **What will success look like?**

In order to achieve these ambitious goals, we must collectively work to provide our students with high quality, college and career ready aligned instruction. The Tennessee State Standards provide a common set of expectations for what students will know and be able to do at the end of a grade. The State of Tennessee provides two sets of standards, which include the Standards for Mathematical Content and The Standards for Mathematical Practice. The Content Standards set high expectations for all students to ensure that Tennessee graduates are prepared to meet the rigorous demands of mathematical understanding for college and career. The eight Standards for Mathematical Practice describe the varieties of expertise, habits of mind, and productive dispositions that educators seek to develop in all students. The Tennessee State Standards also represent three fundamental shifts in mathematics instruction: **focus, coherence and rigor**.

## Instructional Shifts for Mathematics

Throughout this curriculum map, you will see resources as well as links to tasks that will support you in ensuring that students are able to reach the demands of the standards in your classroom. In addition to the resources embedded in the map, there are some high-leverage resources around the content standards and mathematical practice standards that teachers should consistently access. For a full description of each, click on the links below.

### How to Use the Curriculum Map

#### Overview

An overview is provided for each quarter and includes the topics, focus standards, intended rigor of the standards and foundational skills needed for success of those standards.

Your curriculum map contains four columns that each highlight specific instructional components. Use the details below as a guide for information included in each column.

#### Tennessee State Standards

TN State Standards are located in the left column. Each content standard is identified as Major Content or Supporting Content. A key can be found at the bottom of the map.

#### Content

This section contains learning objectives based upon the TN State Standards. Best practices tell us that clearly communicating measurable objectives lead to greater student understanding. Additionally, essential questions are provided to guide student exploration and inquiry.

#### Instructional Support

District and web-based resources have been provided in the Instructional Support column. You will find a variety of instructional resources that align with the content standards. The additional resources provided should be used as needed for content support and scaffolding.

#### Vocabulary and Fluency

The inclusion of vocabulary serves as a resource for teacher planning and for building a common language across K-12 mathematics. One of the goals for Tennessee State Standards is to create a common language, and the expectation is that teachers will embed this language throughout their daily lessons. In order to aid your planning, we have also included a list of fluency activities for each lesson. It is expected that fluency practice will be a part of your daily instruction. (Note: Fluency practice is not intended to be speed drills, but rather an intentional sequence to support student automaticity. Conceptual understanding must underpin the work of fluency.

#### Instructional Calendar

As a support to teachers and leaders, an instructional calendar is provided **as a guide**. Teachers should use this calendar for effective planning and pacing, and leaders should use this calendar to provide *support* for teachers. Due to variances in class schedules and differentiated support that may be needed for students' adjustment to the calendar may be required.

# Curriculum and Instruction – Mathematics

Quarter 3

Grade 8

## Grade 8 Quarter 3 Overview

**Module 5: Examples of Functions in Geometry**

**Module 6: Linear Functions**

**Module 7: Intro to Irrational Numbers Using Geometry**

The chart below includes the standards that will be addressed in this quarter, the type of rigor the standards address, and foundational skills needed for mastery of these standards. Consider using these foundational standards to address student gaps during intervention time as appropriate for students

Grade Level Standard	Type of Rigor	Foundational Standards
➤ 8.F.A.1	Conceptual Understanding	7.RP.A.2
8.F.A.2	Conceptual Understanding	7.RP.A.2
8.F.A.3	Conceptual Understanding	
➤ 8.F.B.4	Conceptual Understanding & Procedural Fluency	7.RP.A.2
➤ 8.F.B.5	Conceptual Understanding	
➤ 8.G.C.7	Conceptual Understanding & Application	
8.SP.A.1	Conceptual Understanding	6.NS.8
8.SP.A.2	Conceptual Understanding	
8.SP.A.3	Conceptual Understanding & Application	
8.SP.A.4	Conceptual Understanding, Procedural Fluency & Application	7.SP.C.5, 7.SP.C.6
➤ 8.NS.A.1	Conceptual Understanding & Procedural Fluency	7.NS.A.2
8.NS.A.2	Conceptual Understanding	
➤ 8.EE.A.2	Conceptual Understanding & Procedural Fluency	6.EE.B.5, 6.EE.B.7, 6.EE.B.8
➤ Indicates the Power Standard based on the 2017-18 TN Ready Assessment.

Describe patterns such as clustering, outliers, positive or negative association, linear association, and nonlinear association.</p> <p>➤ <b>8.SP.A.2</b> Know that straight lines are widely used to model relationships between two quantitative variables. For scatter plots that suggest a linear association, informally fit a straight line, and informally assess the model fit by judging the closeness of the data points to the line.</p> <p>➤ <b>8.SP.A.3</b> Use the equation of a linear model to solve problems in the context of bivariate measurement data, interpreting the slope and intercept. For example, in a linear model for a biology experiment, interpret a slope of 1.5 cm/hr as meaning that an additional hour of sunlight each day is associated with an additional 1.5 cm in mature plant height.</p>	<p><b>Essential Question(s):</b> What kind of patterns can be found in bivariate data?</p> <p><b>Topic C Objectives:</b></p> <p><b>Lesson 10 (8.SP.A.3)</b></p> <ul style="list-style-type: none"> <li>Students identify situations where it is reasonable to use a linear function to model the relationship between two numerical variables.</li> <li>Students interpret slope and the initial value in a data context.</li> </ul> <p><b>Lesson 11 (8.SP.A.1, 8.SP.A.2, 8.SP.A.3)</b></p> <ul style="list-style-type: none"> <li>Students recognize and justify that a linear model can be used to fit data.</li> <li>Students interpret the slope of a linear model to answer questions or to solve a problem.</li> </ul> <p><b>Lesson 12 (8.SP.A.1, 8.SP.A.2, 8.SP.A.3)</b></p> <ul style="list-style-type: none"> <li>Students give verbal descriptions of how <math>y</math> changes as <math>x</math> changes given the graph of a nonlinear function.</li> <li>Students draw nonlinear functions that are consistent with a verbal description of a nonlinear relationship.</li> </ul>	<p><b>Topic C Linear and Nonlinear Models</b></p> <p><b>Topic C Teacher Toolbox Alignment:</b></p> <ul style="list-style-type: none"> <li><b>Lesson 30: Solve Problems with Linear Models</b></li> </ul> <p><a href="#">Integrating Teacher Toolbox Lessons</a></p> <p><b>Lesson 10</b> <b>Lesson 11</b> <b>Lesson 12 (Optional)</b> <b>Omit Lessons 13-14 because they address a standard that is no longer an 8<sup>th</sup> grade TN Math State Standard.</b></p> <p><b>Additional Resources:</b> <i>These optional resources may be used for extension, enrichment and/or additional practice.</i> <a href="#">Illustrative Math: Animal Brains 8.SP.A.1, 8.SP.A.2</a> <a href="#">Illustrative Math: Laptop Battery Charge 8.SP.A.2</a> <a href="#">Illustrative Math Task: US Airports, Assessment Variation 8.SP.3</a></p> <p>Continued below</p>	<p><b>Vocabulary Module 6 Topic C</b> Association Bivariate Data Set</p> <p><b>Familiar Terms and Symbols for Module 6</b> Categorical variable Intercept or initial value Numerical variable Slope</p>

Quarter 3

Grade 8

<p><b>Domain:</b> Statistics and Probability  <b>Cluster:</b> Investigate chance processes and develop, use and evaluate probability models.</p> <p>➤ <b>8.SP.A.4 (New to 8<sup>th</sup> grade)</b> Find probabilities of compound events using organized lists, tables, tree diagrams, and simulation. Understand that, just as with simple events, the probability of a compound event is the fraction of outcomes in the sample space for which the compound event occurs. Represent sample spaces for compound events using methods such as organized lists, tables, and tree diagrams. For an event described in everyday language (e.g., "rolling double sixes"), identify the outcomes in the sample space which compose the event.</p>	<p><b>Grade 7 Module 5 Topic A (Addresses 8.SP.A.4)</b></p> <p><b>Lesson 6</b></p> <ul style="list-style-type: none"> <li>Given a description of a chance experiment that can be thought of as being performed in two or more stages, students use tree diagrams to organize and represent the outcomes in the sample space.</li> <li>Students calculate probabilities of compound events.</li> </ul> <p><b>Lesson 7</b></p> <ul style="list-style-type: none"> <li>Students will calculate probabilities of compound events.</li> </ul>	<p>Topic C, cont'd</p> <p><b>Grade 7 Module 5 Topic A (Addresses 8.SP.A.4)</b></p> <p><b>Lesson 6</b></p> <p><b>Lesson 7</b></p> <p><b>Additional Resources:</b> <i>These optional resources may be used for extension, enrichment and/or additional practice.</i></p> <p><a href="#">Illustrative Math: Red, Green or Blue? 8.SP.A.4</a></p> <p><a href="#">Illustrative Math: Waiting Times 8.SP.A.4</a></p> <p><a href="#">Illustrative Math: Sitting Across from Each Other 8.SP.A.4</a></p> <p><b>End of Module 6 Assessment &amp; Review of Assessment: Omit #2</b>  <i>(Complete by 3/5/20)</i> <b>or</b>  <a href="#">Optional Quiz for M6 Topic C</a></p> <p>Please include items to assess TN Math 8.SP.A.4</p>	<p><b>Vocabulary Module 6 Topic C</b></p> <p>Association          Bivariate Data Set</p> <p><b>Familiar Terms and Symbols for Module 6</b></p> <p>Categorical variable          Intercept or initial value          Numerical variable          Slope</p>

TN STATE STANDARDS	CONTENT	INSTRUCTIONAL SUPPORT	VOCABULARY
<b>Module 7 Intro to Irrational Numbers Using Geometry</b> <b><u>Grade 8 Pacing and Preparation Guide</u></b> (Allow approximately 1 week for instruction, review and assessment)			
<p><b>Domain:</b> Number System  <b>Cluster:</b> Know that there are numbers that are not rational and approximate them by rational numbers.</p> <p>➤ <b>8.NS.A.1</b> Know that numbers that are not rational are called irrational. Understand informally that every number has a decimal expansion; for rational numbers show that the decimal expansion repeats eventually or terminates, and convert a decimal expansion which repeats eventually or terminates into a rational number.</p> <p>➤ <b>8.NS.A.2</b> Use rational approximations of irrational numbers to compare the size of irrational numbers locating them approximately on a number line diagram. Estimate the value of irrational expressions such as <math>\pi^2</math>. For example, by truncating the decimal expansion of <math>\sqrt{2}</math>, show that <math>\sqrt{2}</math> is between 1 and 2, then between 1.4 and 1.5, and explain how to continue on to get better approximations.</p> <p><b>Domain:</b> Expressions and Equations  <b>Cluster:</b> Work with radicals and integer exponents.</p> <p>■ <b>8.EE.A.2</b> Use square root and cube root symbols to represent solutions to equations of the form <math>x^2 = p</math> and <math>x^3 = p</math>, where <math>p</math> is a positive rational number. Evaluate square roots of small perfect squares and cube roots of small perfect cubes. Know that <math>\sqrt{2}</math> is irrational.</p>	<p><b>Essential Question(s):</b></p> <ul style="list-style-type: none"> <li>How do radicals and exponents influence one's understanding of other content, such as geometry and science?</li> <li>What is the relationship between squares and square roots? Cube and cube roots?</li> </ul> <p><b>Topic A Objectives:</b>  <b>Lesson 1 (8.NS.A.2)</b></p> <ul style="list-style-type: none"> <li>Students know that they can estimate the length of a side of a right triangle as a number between two integers and identify the integer to which the length is closest.</li> </ul> <p><b>Lesson 2 (8.NS.A.2, 8.EE.A.2)</b></p> <ul style="list-style-type: none"> <li>Students are introduced to the notation for square roots.</li> <li>Students approximate the location of square roots of whole numbers on the number line.</li> </ul> <p><b>Lesson 3 (8.NS.A.2)</b></p> <ul style="list-style-type: none"> <li>Students know that the positive square root and the cube root exist for all positive numbers and both a square root of a number and a cube root of a number are unique.</li> <li>Students solve simple equations that require them to find the square root or cube root of a number.</li> </ul> <p><b>Lesson 5 (8.EE.A.2)</b></p> <ul style="list-style-type: none"> <li>Students find the positive solutions to equations algebraically equivalent to equations of the form <math>x^2=p</math> and <math>x^3=p</math>.</li> </ul>	<p><b>Topic A: Square and Cube Roots</b></p> <p><b>Topic A Teacher Toolbox Alignment:</b></p> <ul style="list-style-type: none"> <li><b>Lesson 2: Square Roots and Cube Roots</b></li> </ul> <p><a href="#">Integrating Teacher Toolbox Lessons</a></p> <p><b>Lesson 1</b>            (During this lesson it may be helpful to work with students on approximating square and cube roots of values that are not perfect squares or perfect cubes. One suggested resource can be found <a href="#">here.</a>)</p> <p><b>Lesson 2</b></p> <p><b>Lesson 3</b>            (For Lesson 3 it is <u>suggested</u> to only do Exercises 1-6, Exit Ticket #1-2 and Problem Set #1-4 &amp; 7-9)</p> <p><b>Lesson 4 Omit</b></p> <p><b>Lesson 5</b></p> <p><a href="#">Optional Quiz for Module 7 Topic A</a></p> <p><b>Additional Resources:</b> <i>These optional resources may be used for extension, enrichment and/or additional practice, as needed.</i></p> <p><a href="#">Formative Assessment items for 8.EE.A.2</a>  <a href="#">Illustrative Math Tasks for 8.NS.1</a>  <a href="#">Illustrative Math Tasks for 8.NS.2</a></p>	<p><b>Vocabulary for Module 7 Topic A</b></p> <p>Cube Root            Decimal Expansion            Irrational Number            Perfect Square            Rational Approximation            Real Number            Square Root of a Number</p> <p><b>Familiar Terms and Symbols for Module 7</b></p> <p>Decimal Expansion            Finite Decimals            Number Line            Rate of Change            Rational Number            Volume</p>

## RESOURCE TOOLKIT

The Resource Toolkit provides additional support for comprehension and mastery of grade-level skills and concepts. While some of these resources are imbedded in the map, the use of these categorized materials can assist educators with maximizing their instructional practices to meet the needs of all students.

<p><b>Textbook Resources</b>  <a href="http://www.greatminds.org">www.greatminds.org</a>  <a href="#">Eureka Math Grade 8 Remediation Guides</a>  <a href="#">Remediation Tools</a></p>	<p><b>Standards Support</b>  <a href="#">TNReady Math Standards</a>  <a href="#">Grade 8 Instructional Focus Document</a>  <a href="#">Achieve the Core</a>  <a href="#">Edutoolbox</a></p>	<p><b>Videos</b>  <a href="#">Khan Academy</a>  <a href="#">Learn Zillion</a></p>
<p><b>Calculator Activities</b>  <a href="#">TI-73 Activities</a>  <a href="#">CASIO Activities</a>  <a href="#">TI-Inspire for Middle Grades</a></p>	<p><b>Interactive Manipulatives</b>  <a href="#">Glencoe Virtual Manipulatives</a>  <a href="#">National Library of Interactive Manipulatives</a></p> <hr/> <p><b>SEL Resources</b>  <b>SEL Connections with Math Practices</b>   <a href="#">SEL Core Competencies</a>  <a href="#">The Collaborative for Academic, Social, and Emotional Learning (CASEL)</a></p>	<p><b>Additional Sites</b>  <a href="#">Embarc Online</a>  <a href="#">PBS: Grades 6-8 Lesson Plans</a>  <a href="#">Grade 8 Flip Book</a>            (This book contains valuable resources that help develop the intent, the understanding and the implementation of the state standards.)  <a href="https://academy.act.org/">https://academy.act.org/</a>  <a href="https://opened.com">https://opened.com</a></p>
