Decision Analytics & Information Management (DA&IM)
Creating an Intervention

What is an Intervention?

An intervention is a service that assists a student in overcoming the issues they are having or dealing with. You can create interventions and intervention plans within the platform for each specific student or by groups of students at a time, depending upon how your school wants to implement the platform. Steps to create an intervention for a student are below.
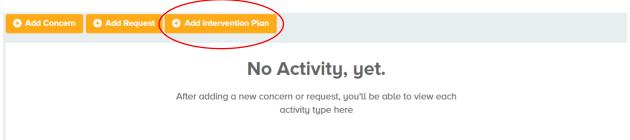

Where to go?

You may access the concern section by

1) logging into Clarity
2) selecting a student
3) clicking on the **Interventions** tab (see below)

4) This list will show up, where you then click on **Add Intervention Plan**

5) You will choose the specific student(s) names in the Student Names section.
6) You will choose the category the plan falls under, and the start and end date of the intervention. You can also log the need for the intervention plan and its overall goal
7) Once done, you then click the submit button at the bottom right
