

# FACTS ABOUT 2018 TVAAS RESULTS

TVAAS (growth) scores for the 2017-18 school year show strong signs of growth. Over half of our schools (84) met or exceeded state benchmarks (Level 3, 4 or 5), 31 more than 2017. More schools also improved from the lowest achievement level. District-wide Literacy and Science scores grew from Level 1 to Level 5. Overall, this helped the District improve from Level 1 to Level 2, an indication more students are approaching grade level proficiency. We've made many targeted investments over the past couple years to strengthen curriculum, professional development and interventions, so the progress we're seeing is exactly what we envisioned. As we celebrate these gains, we also recognize there is a lot of critical attention still required to make sure all students can master the standards and become college- and career-ready.
