

# Supply Chain Management

Marketing, Distribution, & Logistics

## JOB OUTLOOK

Employment of logisticians is projected to grow 28 percent from 2021 to 2031, much faster than the average for all occupations.

About 24,800 openings for logisticians are projected each year, on average, over the decade. Many of those openings are expected to result from the need to replace workers who transfer to different occupations or exit the labor force, such as to retire.

## OCCUPATION PROFILE

Logisticians analyze and coordinate an organization’s supply chain—the system that moves a product from supplier to consumer. They manage the entire life cycle of a product, which includes how a product is acquired, allocated, and delivered.

Logisticians use software systems to plan and track the movement of products. They operate software programs designed specifically to manage logistical functions, such as procurement, inventory management, and other supply chain planning and management systems.

Logistics Analyst	Logistics Engineers	Logisticians	Supply Chain Managers	Transportation, Storage, and Distribution Managers

## ROAD MAP TO SUCCESS

### PROGRAM OF STUDY PROFILE

Supply Chain Management: Foundations & Principles exposes students to careers and businesses involved in the planning, management, and movement of people, materials, and products by road, air, rail, pipeline, and water. As an introduction to this important and globally evolving field, this course covers the basic principles of logistics, reviews the history and development of distribution networks, and examines how they function within the dynamics of the supply chain. Upon completion of this course, proficient students will explore career options; demonstrate an understanding of the historical, current, and future significance of supply chain industries; and plan for the effective and efficient flow of goods and services. This course will require extensive Microsoft Office applications including but not limited to PowerPoint creation; use of templates; spreadsheet manipulations; and designing of charts, graphs, formulas, and tables.
